

Susan M. Quinn MS, ARNP, NNP-BC is a full-time neonatal nurse practitioner and educator. Susan graduated from Northeastern University in Boston as a neonatal nurse practitioner in 1996.

She currently works full-time as a neonatal nurse practitioner at Dartmouth-Hitchcock Medical Center and is clinical faculty at the Geisel School of Medicine at Dartmouth College. She is presently pursuing her Doctor of Nursing (DNP) from University of Connecticut and will graduate in May 2015. Her research for her doctoral dissertation is examining "*In Utero* Arsenic Exposure and Neurodevelopmental Impairment in Term Infants: A Pilot study".

Susan also developed and taught the first pharmacology course for the post-mater's neonatal nurse practitioner program at UConn in 2013. She has also been adjunct faculty at UConn and Castleton State College in VT teaching courses within the schools of nursing.

She is an active member of National Association of Neonatal Nurses. Her research abstract "*In Utero* Arsenic Exposure and Neurodevelopmental Impairment in Term Infants: A Pilot Study was recently accepted for presentation at NANN's 10th Annual Research Summit in March 2015.
