

PROGRAM OVERVIEW

The purpose of the School Nurse Emergency Medical Services for Children Program is to reduce morbidity and mortality in children and youths who are injured or become ill at school. This 3-day workshop will be presented by a team of instructors and includes lectures, slides, and demonstrations/practice techniques to teach assessment, triage, and critical problem-solving scenarios with emergency medical services personnel. Training includes the role of the School Nurse in emergency planning.

Upon completion of the SNEMS-C program, school nurses should be able to:

- ◇ Use prioritized assessment skills recognized by EMS-C
- ◇ Provide a level of pre-hospital care that conforms with EMS-C protocols
- ◇ Develop a comprehensive school emergency plan with their schools and communities
- ◇ Develop specific intervention strategies for student with special needs
- ◇ Collect and analyze data on school related injuries to improve student health

"I'd like each nurse in my district to eventually take it... Great job, I feel more confident going back to school."
