Grading Policy:

All intermediate calculations of grades throughout a course will be expressed on a 0.00-100.00 scale and will be recorded to two decimal place precision -e.g. 95.00 or 92.67. Final numeric grades for a course will be based on averaging of intermediate grades. Typically, the averaging process will give different weights to different intermediate grades -e.g. exam grades may "count more" than homework grades. In the conversion of a final numeric grade to a course letter grade, decimal parts below 0.50 will be "rounded down to the closest whole number -e.g. 92.49 becomes 92 and decimal parts at or above 0.50 will be "rounded up" to the closest whole number -e.g. 92.50 becomes 93.
