Medication Math Competency Exam

• The passing grade for a Medication exam is 100%.
• A student must achieve a Medication Math Competency grade of 100% correct in order to administer medications and IV fluids in the clinical setting.
• When a student does not achieve a grade of 100% after the specified number of attempts, 7.5 percentage points will automatically be deducted from the final clinical evaluation tool (CET). For each subsequent exam that is not passed, an additional 7.5 points will be deducted until the student’s CET grade is C- or less.
• For Fall semester Juniors and Spring semester CEIN students in courses NURS 3234 or 4304, students have 3 attempts during the semester to take a Medication Math Competency exam and achieve 100% with no penalty.
• For Spring semester Juniors, Fall semester Seniors, and Summer semester CEIN students in courses NURS 3334, 3444, 3554, 3664, 4414, 4424, 4434, students have 2 attempts during the semester to take a Medication Math Competency exam and achieve 100% with no penalty.
• For Spring semester Seniors and Fall semester CEIN students in courses NURS 4292, 4544, 4554, students have only one attempt during the semester to take a Medication Math Competency exam and achieve 100% with no penalty.
• When a student does not achieve a grade of 100% on any exam attempt, remediation with an instructor, a teaching assistant, or both is mandatory. The student must wait a minimum of one week between each exam retake. It is suggested that the student utilize study materials before each Medication Math Competency exam.
