Program Overview

The purpose of the School Nurse Emergency Medical Services for Children Program is to reduce morbidity and mortality in children and youths who are injured or become ill at school. This 3-day workshop will be presented by a team of instructors and includes lectures, slides, and demonstrations/practice techniques to teach assessment, triage, and critical problem-solving scenarios with emergency medical services personnel. Training includes the role of the School Nurse in emergency planning.

Upon completion of the SNEMS-C program, school nurses should be able to:

◊ Develop a comprehensive school emergency plan with their schools and communities
◊ Develop specific intervention strategies for student with special needs
◊ Use prioritized assessment skills recognized by EMS-C
◊ Provide a level of pre-hospital care that conforms with EMS-C protocols
◊ Collect and analyze data on school related injuries to improve student health

“I’d like each nurse in my district to eventually take it…Great job, I feel more confident going back to school.”

“I would recommend that a high level school administrator principal, VP and head nurse from every school district attend.”

July 8-10, 2019
School Nurse Emergency Medical Services for Children Program - SUMMER 2019

A program of UConn’s School of Nursing.

The program is approved for 18.25 contact hours by the Northeast Multistate Division.

“This continuing nursing education activity was approved by the Northeast Multistate Division, an accredited approver by the authority of the American Nurses Credentialing Center’s Commission on Accreditation.”
