Program Overview

The purpose of the School Nurse Emergency Medical Services for Children Program is to reduce morbidity and mortality in children and youths who are injured or become ill at school. This 3-day workshop will be presented by a team of instructors and includes lectures, slides, and demonstrations/practice techniques to teach assessment, triage, and critical problem-solving scenarios with emergency medical services personnel. Training includes the role of the School Nurse in emergency planning.

Upon completion of the SNEMS-C program, school nurses should be able to:

◊ Develop a comprehensive school emergency plan with their schools and communities
◊ Develop specific intervention strategies for students with special needs
◊ Use prioritized assessment skills recognized by EMS-C
◊ Provide a level of pre-hospital care that conforms with EMS-C protocols
◊ Collect and analyze data on school related injuries to improve student health

“I’d like each nurse in my district to eventually take it…Great job, I feel more confident going back to school.”

“I would recommend that a high level school administrator principal, VP and head nurse from every school district attend.”

July 13 to 15, 2020
School Nurse Emergency Medical Services for Children Program - Summer 2020

A program of UConn's School of Nursing.

The program is approved for 19 contact hours by the Northeast Multistate Division.
