Hartford Healthcare Central Region has developed a Student Nurse Advancement Pipeline program to help facilitate student nurses’ growth and development. Below is a position open and available to junior nursing students who are having their first clinical experiences this fall.

- **Student Nursing Technician** – this is an entry level clinical nursing technician role offered to junior nursing students who have successfully completed their fall semester and are preparing to enter their spring semester. They are provided with a comprehensive hospital onboarding and unit orientation with a nursing technician. *We are currently recruiting for our December cohort.*

If you are interested in the position, please contact:
