Do you see yourself in a supportive Nurse Residency Program? We do!

Backus Hospital Nurse Residency Program is open to new graduate nurses with less than one year of acute RN experience, who are eligible to take, or have passed their NCLEX and/or hold a CT state RN license. This program is an opportunity for newer nurses who are looking for employment in an acute care setting, but would like to further enhance their nursing skills under the direction of a clinical education program.

**Full one-year residency, which includes:**

- Several learning tracks including, but not limited to, Medical/Surgical/Telemetry, Emergency, Behavioral Health, Critical Care, Operating Room, and Labor and Delivery.
- Immersive learning in a balanced environment, with a combination of clinical and classroom days that include: one-on-one meetings with your track educator, clinical simulations, and guest speakers.
- Fully benefit eligible employment in a supportive and challenging environment.

By completing the Nurse Residency Program, newly-licensed nurses are able to competently and safely manage a full patient assignment with confidence, and will be well-positioned to become future leaders in the nursing profession.

Backus Hospital is a partner of Hartford HealthCare – a healthcare system on the forward edge of medical progress and patient care: the most advanced technologies, and groundbreaking approaches to treatment. We know you want to learn, grow and contribute to healing and health. No matter where you work in the Hartford HealthCare system, you're connected to the team that's redefining care.

**Accepting applications now for all 2022 start dates**

*February 28 · July 18 · October 24*
